DENSO
MANUFACTURING
CZECH, S.R.O

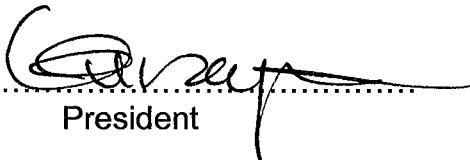

ENVIRONMENTAL POLICY

The top management of Denso Manufacturing Czech, spol. s r.o., the important supplier of air-conditioning units for the automotive industry operating in the industrial zone of the city of Liberec since 2001, enounces the following Environmental policy, within which it commits to especially:

1. Adhere to all legal regulations and other authorised requirements related to environmental protection during manufacturing, storage and transport of its products.
2. Maintain, within the development of products, technological and other processes and the control system, the constant improvement in the area of environmental protection. Focus especially on reduction of natural sources and energy consumption, minimisation of creation of wastes, prevention of polluting in the area of air and water management and improvement of the environment.
3. Include the objectives, objective values and programs of the environmental protection to all levels of the business plan and review their performance and efficiency of the system within the management assessment.
4. Implement an education program for increase of awareness of its associates regarding the Environmental policy and principles of their ecological behaviour.
5. Co-operate with appropriate offices, municipalities and communities of interest so that the state and regional Environmental policy would be respected.
6. Document, implement and maintain the Environmental policy and communicate it to all associates of the company and present it to public using a suitable form.
7. Promote the Environmental policy in the suppliers' direction.

For associates of the company the Environmental policy is obligatory and its co-assurance is a part of their general duties.
