DENSO
MANUFACTURING
CZECH, S.R.O

ENVIRONMENTAL POLICY

Denso Manufacturing Czech Company s.r.o., the important supplier of air- conditioning units for automotive industry operating in the industrial area in Liberec.

System of an environmental management is applied and certified for all activities connected with "Production of air conditioning systems, their parts and heater exchangers for automotive".

The top management announces the following environmental policy in which commits especially to:

1. Adhere to all legal regulations and other authorized requirements related to environmental protection during development, manufacturing, storage and transport of its products.
2. Maintain, within the development of products, technological and other processes and the control system, the constant improvement in the area of environmental protection. Focus especially on reduction of natural sources and energy consumption, minimization of creation of wastes, prevention of polluting in the area of air and water management and to increase its environmental efficiency.
3. Include the objectives and programs of the environmental protection to all levels of the business plan and review their performance and efficiency of the system within the management assessment.
4. Apply an education program for increase of awareness of its associates regarding the Environmental policy and principles of their ecological behaviour.
5. Co-operate with appropriate offices, municipalities and communities of interest so that the state and regional Environmental policy would be respected.
6. Document, implement and maintain the Environmental policy and communicate it to all associates of the company and use a suitable form to ensure the availability to all involved parties.
7. Promote the Environmental policy in the suppliers' direction.
8. Contribute to the environment protection in the Liberec region by supported and volunteered DMCZ employee cooperation with local organizations.

For associates of the company the Environmental policy is obligatory and its co-assurance is a part of their general duties.
